

Peter Anderson
Chief Technology Officer

EXECUTIVES

As the chief technology officer for CSCI, Peter Anderson is a technology strategist. He identifies new, innovative products which can satisfy information technology requirements that previously seemed unachievable. He looks ahead, endeavoring to keep CSCI's team on top of burgeoning federal government requirements for information security, modular certification and quality assurance. Since 1990, as a strategist, Mr. Anderson also assists government clients in formulating their information technology requirements and provides feedback on how those requirements may affect an agency's policies and procedures.

Mr. Anderson is the visionary behind CSCI's unique secured information environment, Cardinal Suite™ and CSCI Flagship Product Environment, formerly known as Trusted Information Infrastructure (TIITM). In 2007, Washington Technology magazine presented Anderson with a Government Channel Leadership Award primarily for leading the development of CSCI's Cardinal Suite™ flagship product. He oversees the company's PL3, PL4 and PL5 security architectural design, development and implementation processes. And, Mr. Anderson works to expand CSCI's business opportunities by developing partnerships with associated businesses in the information technology community and security architecture design.

Mr. Anderson has a Bachelor of Science degree from Virginia Polytechnic Institute and State University. He has also completed the Chief Information Officer Academy through the University of South Carolina.
